

Product Data Sheet

Fortress: F716.3.22

ALERTS, ATTENDANCE, SAFETY TRAINING, MONITORING, & MORE

Fortified's Fortress delivers post-construction services to pre-CO jobsites. Fortress and its integrated sentry units afford developers, insurance companies, and GC's with unparalleled visibility and data of the jobsite and the tradespeople performing the work.

- ⇒ Overwatch Sentry provides robust cameras easily deployed around the building in either a wired or wireless manner. Over 168 cameras can be deployed and are accessible anywhere, anytime via Fortified's cloud based ARC platform and Outpost & Power Puck adapters.
- ⇒ Protect Sentry serves as a fire, motion, and water intrusion system alerting GC's and first responders of trespass or fire/heat events accessible domestically or via the cloud based ARC platform.
- ⇒ Gatekeeper Sentry identifies workers and high-dollar tooling as it enters and exits the site or even specific floors. The GC knows, at all times, who is working, what caliber of tradesperson is completing the work, and what the safety training history is of the worker for faster on-boarding and in-service education. Gatekeeper Sentry is adding Certified Payroll in Q3 2024.

FEATURES AND BENEFITS

- Designed by construction for construction focused on ease of use and functionality
- 2 millisecond delay from event trigger to ARC notification
- Smart detection and analytics
- Bi-Spectrum optics for enhanced safety
- Event trigger lighting and rope light integration
- Remotely monitored 24/7/365 with the ability to supply first responders with worker attendance within seconds of an event
- Global accessibility by project team members
- User programmable schedule, and arming with independent system control as needed

Fortress: F716.3.22

SPECIFICATIONS:

IP 65 Case

24" Ruggedized Touch Screen

One-touch Power On/Off

8 Viewable Camera Feeds (168+ Camera Capable)

One-touch Arm/Disarm

Sensor Status: Heartbeat & Location

Weather, Time, & Temperature Display

Rope Light Controls

One-touch Tech Support Contact

SOS Evacuation/Rally-Point Button

Realtime Jobsite Attendance and Headcount

Quick Worker Communication App

External Power and Alarm Indicator Lights

4+ POE Ports

WAN/LAN Ports

French Cleat Mounting System

110v Power Cable & Port

Lockable Door

Power Use, Operating Range, & Dimensions:

Equivalent to Approximately 70 Watts

Operating Temperatures: -20F to 100F

Approx. 18" x 8" x 24" (W/D/H)

Communications:

Dual SIM service router with failover (Verizon and AT&T unless specified)

Wireless Frequencies: 2.4 GHz, 5 GHz, and 345 & 900 MHz

GPS Enabled: Yes

Fortified ARC Link: Yes

Deployment: 1) Using screws (not included), securely affix the receiving French Cleat in studs or backing board near a power source. 2) With two people, place the unit on the cleat. 3) Use the security screw on the bottom cleat to prevent removal from wall. An optional lock or hasp can be placed to lock the device to the wall. 4) Plug in and power on the unit. 5) Use an optional lock to secure the door from opening.

LEADTIME & ORDERING:

2-7 business days
